CALENDAR PLAN FOR SUBJECT PROGRAM IMPLEMENTATION

(Lectures, seminars, laboratories, practical classes, course work)

Faculty: Economics

Name of the subject: **Statistics**

Lecturer:

Counselor and practitioner:

Specialty: 60410500 – Banking and audit

Academic groups: BA-156-21, BA- 157-21, BA-158-21

Senior teacher Sherzod Turobov

Senior teacher Sherzod Turobov

Lecture	30
Practical training	30
Laboratory	N/A
Self study	120
Overall:	180

№	Name of themes	Hours	Completion information		Signature
			Date	Hours	
	LECTURES				
	3ʳᵈ semester				
1	Introduction to the science of statistics	2			
2	Theory and practice of collecting statistical data	2			
3	Statistical summary and grouping.	2			
4	Displaying statistical data in tables and graphs	2			
5	Vizual statistical indicators	2			
6	Average values	2			
7	Methods for estimating variation in statistics and the basics of analysis of dispersion	2			
8	Dispersion. Types of dispersion	2			
9	Application of selective observation in statistical research	2			
10	Selective observations error, ways of determining the required observation size and distribution of observation results	2			
11	Statistical study of interactions	2			
12	Methods for studying the density of interactions	2			
13	Methods of statistical research of dynamics	2			
14	Methods of statistical research of dynamics.	2			
15	Economic indices. Areas of application of economic indices in statistical practice	2			
	Overall:	30			

Complied by: **Senior teacher Sherzod Turobov**
